

CONTENTS

Chapter 1

INTRODUCTION 1

Chapter 2

BASIC CONCEPTS 5

- 2.1 Introduction 5
- 2.2 Definition of Terms 5
- 2.3 Calibration 6
- 2.4 Standards 7
- 2.5 Dimensions and Units 11
- 2.6 The Generalized Measurement System 14
- 2.7 Basic Concepts in Dynamic Measurements 18
- 2.8 System Response 31
- 2.9 Distortion 32
- 2.10 Impedance Matching 32
- 2.11 Fourier Analysis 35
- 2.12 Experiment Planning 46
- 2.13 Review Questions 50
- 2.14 Problems 52
- 2.15 References 58

Chapter 3

ANALYSIS OF EXPERIMENTAL DATA 60

- 3.1 Introduction 60
- 3.2 Causes and Types of Experimental Errors 61
- 3.3 Error Analysis on a Commonsense Basis 62
- 3.4 Uncertainty Analysis and Propagation of Uncertainty 63
- 3.5 Evaluation of Uncertainties for Complicated Data Reduction 72
- 3.6 Statistical Analysis of Experimental Data 74
- 3.7 Probability Distributions 79
- 3.8 The Gaussian or Normal Error Distribution 83

- 3.9 Comparison of Data with Normal Distribution 93
- 3.10 The Chi-Square Test of Goodness of Fit 97
- 3.11 Method of Least Squares 104
- 3.12 The Correlation Coefficient 108
- 3.13 Multivariable Regression 110
- 3.14 Standard Deviation of the Mean 112
- 3.15 Student's t -Distribution 113
- 3.16 Graphical Analysis and Curve Fitting 120
- 3.17 Choice of Graph Formats 121
- 3.18 Causation, Correlations, and Curve-fits 137
- 3.19 General Considerations in Data Analysis 142
- 3.20 Summary 143
- 3.21 Review Questions 144
- 3.22 Problems 144
- 3.23 References 163

Chapter 4

BASIC ELECTRICAL MEASUREMENTS AND SENSING DEVICES 166

- 4.1 Introduction 166
- 4.2 Forces of Electromagnetic Origin 166
- 4.3 Waveform Measures 170
- 4.4 Basic Analog Meters 173
- 4.5 Basic Digital Meters 179
- 4.6 Basic Input Circuits 180
- 4.7 Amplifiers 194
- 4.8 Differential Amplifiers 198
- 4.9 Operational Amplifiers 198
- 4.10 Transformers 203
- 4.11 Power Supplies 204
- 4.12 Signal Conditioning 205
- 4.13 The Electronic Voltmeter 217
- 4.14 Digital Voltmeters 218
- 4.15 The Oscilloscope 220
- 4.16 Oscilloscope Selection 223
- 4.17 Output Recorders 226

- 4.18 Counters—Time and Frequency Measurements 226
- 4.19 Transducers 227
- 4.20 The Variable-Resistance Transducer 227
- 4.21 The Differential Transformer (LVDT) 230
- 4.22 Capacitive Transducers 232
- 4.23 Piezoelectric Transducers 234
- 4.24 Photoelectric Effects 236
- 4.25 Photoconductive Transducers 236
- 4.26 Photovoltaic Cells 239
- 4.27 Ionization Transducers 240
- 4.28 Magnetometer Search Coil 241
- 4.29 Hall-Effect Transducers 242
- 4.30 Digital Displacement Transducers 244
- 4.31 Comparison of Analog and Digital Instruments 245
- 4.32 Summary 245
- 4.33 Review Questions 246
- 4.34 Problems 247
- 4.35 References 254

Chapter 5

DISPLACEMENT AND AREA MEASUREMENTS 256

- 5.1 Introduction 256
- 5.2 Dimensional Measurements 256
- 5.3 Gage Blocks 258
- 5.4 Optical Methods 259
- 5.5 Pneumatic Displacement Gage 262
- 5.6 Area Measurements 264
- 5.7 The Planimeter, a Device of Historical Interest 265
- 5.8 Graphical and Numerical Methods for Area Measurement 266
- 5.9 Surface Areas 271
- 5.10 Problems 272
- 5.11 References 276

Chapter 6

PRESSURE MEASUREMENT 278

- 6.1 Introduction 278
- 6.2 Dynamic Response Considerations 281

- 6.3 Mechanical Pressure-Measurement Devices 283
- 6.4 Dead-Weight Tester 288
- 6.5 Bourdon-Tube Pressure Gage 290
- 6.6 Diaphragm and Bellows Gages 291
- 6.7 The Bridgman Gage 295
- 6.8 Low-Pressure Measurement 296
- 6.9 The McLeod Gage 296
- 6.10 Pirani Thermal-Conductivity Gage 298
- 6.11 The Knudsen Gage 299
- 6.12 The Ionization Gage 300
- 6.13 The Alphatron 301
- 6.14 Summary 302
- 6.15 Review Questions 303
- 6.16 Problems 303
- 6.17 References 310

Chapter 7

FLOW MEASUREMENT 312

- 7.1 Introduction 312
- 7.2 Positive-Displacement Methods 313
- 7.3 Flow-Obstruction Methods 316
- 7.4 Practical Considerations for Obstruction Meters 320
- 7.5 The Sonic Nozzle 329
- 7.6 Flow Measurement by Drag Effects 331
- 7.7 Hot-Wire and Hot-Film Anemometers 340
- 7.8 Magnetic Flowmeters 344
- 7.9 Flow-Visualization Methods 345
- 7.10 The Shadowgraph 347
- 7.11 The Schlieren 348
- 7.12 The Interferometer 351
- 7.13 The Laser Doppler Anemometer (LDA) 353
- 7.14 Smoke Methods 356
- 7.15 Pressure Probes 356
- 7.16 Impact Pressure in Supersonic Flow 365
- 7.17 Summary 366
- 7.18 Review Questions 367
- 7.19 Problems 369
- 7.20 References 377

Chapter 8**THE MEASUREMENT OF TEMPERATURE 381**

- 8.1 Introduction 381
- 8.2 Temperature Scales 381
- 8.3 The Ideal-Gas Thermometer 382
- 8.4 Temperature Measurement by Mechanical Effects 384
- 8.5 Temperature Measurement by Electrical Effects 388
- 8.6 Temperature Measurement by Radiation 409
- 8.7 Effect of Heat Transfer on Temperature Measurement 416
- 8.8 Transient Response of Thermal Systems 425
- 8.9 Thermocouple Compensation 427
- 8.10 Temperature Measurements in High-Speed Flow 430
- 8.11 Summary 434
- 8.12 Review Questions 434
- 8.13 Problems 435
- 8.14 References 444

Chapter 9**THERMAL- AND TRANSPORT-PROPERTY MEASUREMENTS 447**

- 9.1 Introduction 447
- 9.2 Thermal-Conductivity Measurements 448
- 9.3 Thermal Conductivity of Liquids and Gases 452
- 9.4 Measurement of Viscosity 454
- 9.5 Gas Diffusion 461
- 9.6 Calorimetry 465
- 9.7 Convection Heat-Transfer Measurements 470
- 9.8 Humidity Measurements 473
- 9.9 Heat-Flux Meters 478
- 9.10 pH Measurement 481
- 9.11 Review Questions 482
- 9.12 Problems 483
- 9.13 References 489

Chapter 10**FORCE, TORQUE, AND STRAIN MEASUREMENTS 491**

- 10.1 Introduction 491
- 10.2 Mass Balance Measurements 492
- 10.3 Elastic Elements for Force Measurements 496
- 10.4 Torque Measurements 499
- 10.5 Stress and Strain 503
- 10.6 Strain Measurements 505
- 10.7 Electrical-Resistance Strain Gages 505
- 10.8 Measurement of Resistance Strain-Gage Outputs 509
- 10.9 Temperature Compensation 510
- 10.10 Strain-Gage Rosettes 512
- 10.11 The Unbonded Resistance Strain Gage 515
- 10.12 Review Questions 516
- 10.13 Problems 516
- 10.14 References 521

Chapter 11**MOTION AND VIBRATION MEASUREMENT 523**

- 11.1 Introduction 523
- 11.2 Two Simple Vibration Instruments 523
- 11.3 Principles of the Seismic Instrument 525
- 11.4 Practical Considerations for Seismic Instruments 532
- 11.5 Sound Measurements 535
- 11.6 Review Questions 548
- 11.7 Problems 549
- 11.8 References 554

Chapter 12**THERMAL- AND NUCLEAR-RADIATION MEASUREMENTS 556**

- 12.1 Introduction 556
- 12.2 Detection of Thermal Radiation 556
- 12.3 Measurement of Emissivity 562

- 12.4 Reflectivity and Transmissivity Measurements 565
- 12.5 Solar Radiation Measurements 566
- 12.6 Nuclear Radiation 568
- 12.7 Detection of Nuclear Radiation 569
- 12.8 The Geiger-Müller Counter 569
- 12.9 Ionization Chambers 570
- 12.10 Photographic Detection Methods 571
- 12.11 The Scintillation Counter 572
- 12.12 Neutron Detection 572
- 12.13 Statistics of Counting 573
- 12.14 Radiation Effects in Humans 577
- 12.15 Review Questions 579
- 12.16 Problems 579
- 12.17 References 582

Chapter 13

AIR-POLLUTION SAMPLING AND MEASUREMENT 585

- 13.1 Introduction 585
- 13.2 Units for Pollution Measurement 585
- 13.3 Air-Pollution Standards 586
- 13.4 General Air-Sampling Train 589
- 13.5 Gas Sampling Techniques 590
- 13.6 Particulate Sampling Techniques 591
- 13.7 Sulfur Dioxide Measurements 599
- 13.8 Combustion Products Measurements 602
- 13.9 Opacity Measurements 606
- 13.10 Odor Measurement 607
- 13.11 Review Questions 608
- 13.12 Problems 609
- 13.13 References 611

Chapter 14

DATA ACQUISITION AND PROCESSING 612

- 14.1 Introduction 612
- 14.2 The General Data Acquisition System 612
- 14.3 Signal Conditioning Revisited 615
- 14.4 Data Transmission 618
- 14.5 Analog-to-Digital and Digital-to-Analog Conversion 621
- 14.6 Data Storage and Display 629

- 14.7 The Program as a Substitute for Wired Logic 630
- 14.8 Summary 633
- 14.9 Glossary 633
- 14.10 Review Questions 635
- 14.11 Problems 635
- 14.12 References 637

Chapter 15

REPORT WRITING AND PRESENTATIONS 638

- 15.1 Introduction 638
- 15.2 Some General Comments 638
- 15.3 Types of Reports 641
- 15.4 Contents of a Report 643
- 15.5 Graphical Presentations 651
- 15.6 Miscellaneous Helpful Hints 662
- 15.7 Word Processors and Computers 663
- 15.8 Processing of Reports 664
- 15.9 Oral Presentations 666
- 15.10 Planning Sessions and Conferences 667
- 15.11 Review Questions 668
- 15.12 References 670

Chapter 16

DESIGN OF EXPERIMENTS 671

- 16.1 Introduction 671
- 16.2 Types of Experiments 671
- 16.3 Experiment Design Factors 675
- 16.4 Experiment Design Protocol and Examples 675
- 16.5 Summary 710
- 16.6 Problems 711
- 16.7 References 712

APPENDIX A—CONVERSION FACTORS AND MATERIAL PROPERTIES 713

APPENDIX B—DIGITAL IMAGING SYSTEMS 723
